SOLTECH
Smart Solar Lighting

SUNLIKE 8W 20W 30W 50W

APPLICATIONS

This economical, easily-installed, off-grid lighting solution is ideal for areas such as pathways, parking lots, landscaping, parks, schools, trails, or any remote locations that have no access to conventional power.

CERTIFICATION DATA

5 Years Warranty · HIGH LUMEN · IP65 · LM79 · WET LOCATION · UN38.3 · Level 12 WIND TEST

DESCRIPTION

SUNLIKE reduces total cost of ownership, and delivers big performance. This fully-integrated LED solar streetlight is designed for both residential and commercial areas, in four different lumen outputs: 1600lm, 4000lm, 6000lm, and 9,000lm. SUNLIKE also provides superior quality light over a greater area. SUNLIKE features an integrated solar array, battery, and LED fixture with simple mounting, for fast and easy installation. SUNLIKE eliminates trenching, cabling, and electricity costs.

SPECIFICATION FEATURES

50+ Hours Max Autonomy
· UP to 691 WH battery capacity
· Full self-charging time less than 11 hrs
· One-key smart programming

Greater Energy Production
· Up to 115W Mono Crystalline Solar Panel
· Adjustable angle for the fixture head allows maximum solar collection and self-cleaning of the solar panel surface

High Brightness, Smart Power Consumption
· >200lm/W—the highest efficiency in the industry
· Microwave motion sensor and one-key automatic dimming
· Automatically switches to 40% energy saving mode during low battery capacity

Longer Life
· Grade A LifePO^4 Battery Pack, 2000+ full charging cycles
· Lumileds 5050 LED chips

Complete Universality
· 6 different mounting options
· Designed for round pole, square pole and wall pack applications
· Acts as a solar flood light

Low Maintenance Design
· Field-replaceable battery functionality via quick connections
· Die cast A380 aluminum fixture housing is rust free
· 10+ year warranty options for city utility projects

* The temperature can impact the battery's charging and normal operation. If your place's temperature is under 32°F, we advice you to use the SUNLIKE PRO version to achieve better lighting results.
* The solar charge time data is base on 77 degree F ambient temperature with the panel pointed directly at the solar radiation. The standard radiation value is 1000W/m².

SOLTECH
Smart Solar Lighting

SUNLIKE 8W 20W 30W 50W

The Solar charge in a battery pack won't last forever. The off–grid system relies on stored solar energy for autonomy. Angling your solar panels properly can boost the power intake of your solar lighting system. You want to angle your solar panels at a tilt based on the area's latitude.

Tip

You can increase the tilt 15° in the winter or decrease 15° in the summer. In this way you can get the maximum sunlight to recharge the battrey.

Strong sunlight   Normal sunlight   Less sunlight

Best Facing Direction of Solar Panel

Worst

N

W   E

S

OK   OK

Best

The area will dictate the installation of the fixtures and will sometimes prevent the lights from facing south. But that's okay! Panels facing West & East won't get as much light as Southern facing panels, but will still collect a good amount of sunlight. A North facing panel also works, but it will take longer to charge than any other direction. This would mean that the solar charge will be less optimal if installations are facing North.

SUNLIKE 8W 20W 30W 50W

REMOTE CONTROLS

1. On/Off
2. Connect/Test
3. 40%~100% Motion Sensor Mode
4. 20%~80% Motion Sensor Mode (Default)
5. Night Owl Mode
6. Early Bird Mode
7. 100% Constant Mode
8. 70% Constant Mode
9. 40% Constant Mode
10. Timer Mode Disabled
11. Timer Mode 4 Hours
12. Time Mode 8 Hours
When using the remote for the first time, please remove the plastic piece at the bottom to make the remote turn on.

The range of the remote control to the indicator is 16ft (Day time) to 33ft (Night time). Because the sunlight will impact the signal of the remote control, we suggest our users to setup the mode before they install the light.

16ft~33ft

1. On/Off
When off is selected, the light will stop working. The solar panel will not charge the battery and the battery will not supply electricity to the light.

2. Connect/Test
Remote control device can be connected with any lighting fixture, one at a time. To connect, press the button once. It also functions as a test button. To test, press the "Test" button once, the red light will indicate the fixture is charging, green light indicates that the fixture is operating. Testing lasts for 10 seconds, and then it goes back to the mode previously in use.

SUNLIKE 8W 20W 30W 50W

REMOTE CONTROLS

3. 40%~100% Motion Sensor Mode
Constant 40% brightness (turns on at dusk, turns off at dawn); 100% brightness turns on for 2 minutes when motion is detected.

4. 20%~80% Motion Sensor Mode (Default)
Constant 20% brightness (turns on at dusk, turns off at dawn); 80% brightness turns on for 2 minutes when motionis detected.

5. Night Owl Mode
Changes as natural light decreases/increases (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 5 hours (turns off at Dawn).
6. Early Bird Mode
Changes as natural light decreases/increases with increased brightness near dawn for early risers (turns on at dusk); 70% brightness for 0.5 hour, 100% brightness for 3.5 hours, 70% brightness for 1 hour, 50% brightness for 1 hour, 20% brightness for 4 hours, 100% brightness for 1 hour (turns off at Dawn).

(IAP) Intelligent Adaptive Program Battery Control Technology
In order to extend the off-grid autonomy of the SUNLIKE under shady trees, heavy rain, and thick clouds, our controllers now integrate an adaptive smart control feature to actively track battery capacity and adjust light output accordingly. Before integrating this feature, selecting a light output percentage on the remote would yield an accurate percentage of max LED brightness. Now with (IAP), the controller actively monitors the battery and regulates the electrical current to the LEDs. The controller makes light output of the selected percentage on the remote relative to battery capacity rather than max LED output. This smart-control feature can increase our off-grid performance by up to 40%.

Important
Dust and dawn time may be diffrent in other locations and seasons. The sensors of our products will follow the light patterns of where it is installed. The time period shown in the chart above is just an example to help you understand the different lighting modes only.
REMOTE CONTROLS

7. 100% Constant Mode
100% brightness from dusk to dawn.

8. 70% Constant Mode
70% brightness from dusk to dawn.

9. 40% Constant Mode
40% brightness from dusk to dawn.

10. Timer Mode Disabled
Press this button to turn off Timer Mode; settings revert back to before Timer Mode was last activated.
REMOTE CONTROLS

11. Timer Mode 4 Hours
This is an additional mode which can work with any other modes. For example: press this button at any time after you turn on 70% Constant Mode. If the light turns on at 7pm at dusk, it will turn off at 11pm. It will repeat the same schedule hereafter until it is canceled by pressing Timer Mode Disabled.

12. Time Mode 8 Hours
This is an additional mode which can work with any other modes. For example: press this button at any time after you turn on 70% Constant Mode. If the light turns on at 7pm at dusk, it will turn off at 3am. It will repeat the same schedule hereafter until it is canceled by pressing Timer Mode Disabled.

Important
Dust and dawn time can vary for different locations and seasons. The sensors in our products will monitor the light levels where it is installed. The time period shown in the chart above is just an example to help you understand the different lighting modes.
